

With a wide range of options such as CSCS accredited cards for construction sites, standard cards with company restrictions, and multiple category groups, NPORS accreditation can meet with a large variety of industries. NPORS is recognised by the Construction Leadership Council (CLC), Build UK, and also the Accrediting Bodies Association (ABA). Delegate profiling may be required prior to course.

- The following training and testing ratios are the maximum numbers set by the NPORS scheme. They cover novice operator training and testing, through to experienced worker tests.
- Novice durations can be extended to suit the needs of the learner(s) if required.
- Where training durations are to be reduced due to operator experience then correct profiling will take place, and the course duration may only then be reduced once we are satisfied that the operator/s are suitably experienced to undertake a shorter duration course.
- It should be noted that where durations are reduced due to reduced course objectives, restricted cards may be issued.
- CSCS accredited (2 years) cards require proof of valid CITB Health, Safety & Environment test. An NVQ is required to upgrade at the two year point of expiry.
- Employers must assess the suitability of their delegates prior to booking.
- Due to the variation of course durations, all NPORS prices are per person, per day. Mileage is charged at 40p per mile from BN27.
- All prices include registration and card request. CSCS cards = 2 year expiry, Standard Cards = 3 year expiry.
- Stated ratios are: Trainee: Machine: Instructor
